Art Unit: 1732

1.Restriction to one of the following inventions is required under 35 U.S.C. 121:

- I. Claims 1-31, drawn to a method for fabricating an article, classified in class 264, subclass 219.
- II. Claim 32, drawn to a mold, classified in class 249, subclass 117.

2.The inventions are distinct, each from the other because:

Inventions I and II are related as process and apparatus for its practice. The inventions are distinct if it can be shown that either: (1) the process as claimed can be practiced by another materially different apparatus or by hand, or (2) the apparatus as claimed can be used to practice another and materially different process. (MPEP § 806.05(e)). In this case the apparatus as claimed can be used to practice another and materially different process such as one in which the mold of Group II is used to form an article in a single molding step rather than fabricating first and second molds and then forming the article from the second mold.

3.Because these inventions are distinct for the reasons given above and have acquired a separate status in the art requiring divergent fields of search for the respective inventions, restriction for examination purposes as indicated is proper.

4.A telephone call was made to Joseph Scafetta, Jr. on January 24, 2006 to request an oral election to the above restriction requirement, but did not result in an election being made.

5.Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

6. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Allan Kuhns whose telephone number is (571) 272-1202. The examiner can normally be reached on Monday to Thursday from 7:00 to 5:30.
